

# Visualize your network; Secure it!

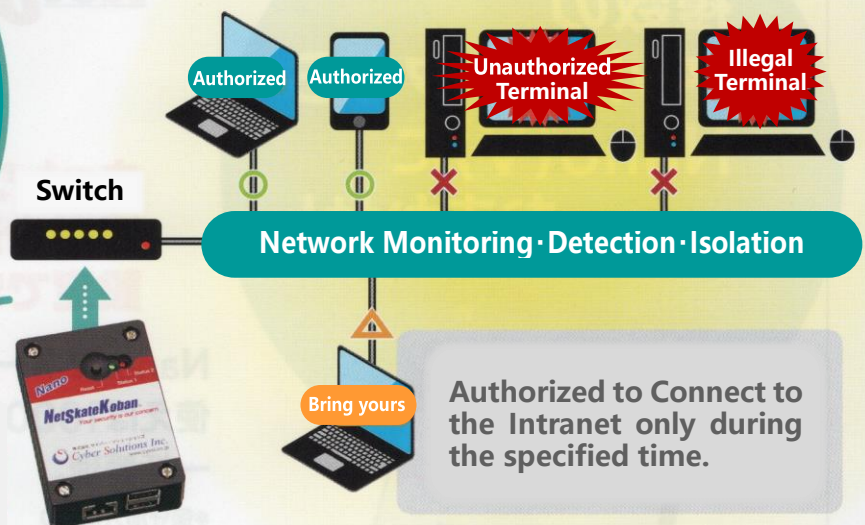

## NetSkateKoban

## The Unique Single Sensor Solution

**Just connect to a port  
on your network!**

Safety &  
Security  
**3 Points**

- 1 Check which terminals/devices are currently connected to the network!
- 2 Block suspicious/unauthorized terminals/devices!
- 3 Check history of terminals/devices connections!

**Know your network. Look closely for changes ... the basis of security!**

**NetSkateKoban Nano will do the basic connection management  
and secure your intranet.**

▼Our Website

Reduce security risk by carefully allowing connections

Where

Only from Specified networks

Only by Authorized Terminals

ACCESS

Who

When

Only at Specified Times

e.g. Mon. to Fri., 9:00 to 18:00

Because it's

**NetSkateKoban**

**Nano**

For homes, schools, small businesses with 1 branch or upto 1,000 branches

The risk in your network is reduced!

A single Nano(V) can handle Multiple V-Lan Networks!

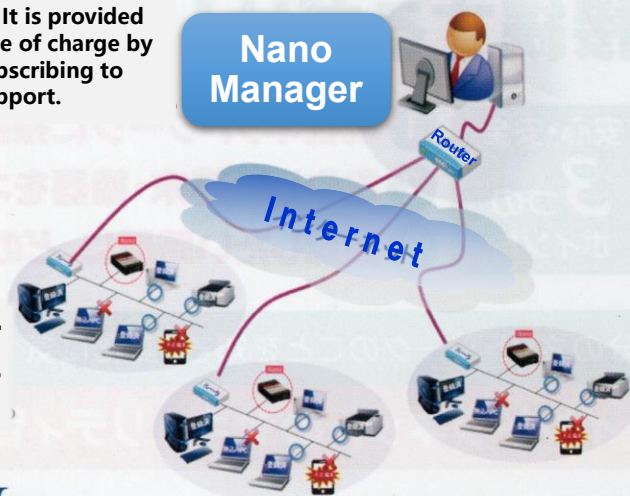

**NetSkateKoban**  
**Nano(V)**

Set the policies for isolation and notification for each network (VLAN)!

Upto 1,000 branches can be centrally managed using a Nano Manager<sup>※</sup>.

※ It is provided free of charge by subscribing to support.

Nano Manager

Please feel free to contact us for product explanations and trial devices for evaluation (free of charge).
